Harmon C. McAllister  
Associate Research Director  
The Council for Tobacco Research  
900 Third Avenue  
New York, NY 10022

Dear Dr. McAllister,

As you may have heard, the 6th International Symposium on "~~Mechanisms of Vasodilatation~~" will take place in ~~Glasgow (UK)~~ on August 1-2, 1993, as an integral part of the XXXIInd International Congress of Physiological Sciences. As in the past, the program will be selected from the submitted Abstracts (which are currently being reviewed by the Scientific Advisory Committee). In addition, ~~three senior scientists~~ will be invited to give the special lectures of the Symposium (3rd John T. Shepherd lecture on "Neurogenic Vasodilatation"; 2nd Robert F. Furchgott lecture on "Endothelium-Dependent Relaxations"; and 1st David F. Bohr lecture on "Vascular Smooth Muscle"). As you can see from the enclosed Table of Contents of the Proceedings of the last two meetings, "Mechanisms of Vasodilatation", over the years, has become a premier event dedicated to vascular control.

The 6th symposium also promises to be a most exciting meeting. We expect all of the leading experts in the world to attend this important conference and many new results will be presented. As in the past, we will arrange for the proceedings to be published as quickly as possible.

We expect the costs of the meeting to be high. A minimal amount will be covered by the registration fees, etc. However, with so much important work being promulgated in Japan, Europe and the United States, there will be a large travel bill. In view of this, we would be most grateful if you would consider making a generous contribution towards the financing of this important meeting.
